

Technical information

Model ⁽¹⁾	Eco					Eco ⁺		
Resin	11	14	17	24	30	11	17	24
Operating pressure min/max (bar)	1,4/8,3					1,4/8,3		
Operating temperature min/max (°C)	2/48					2/48		
Electrical connection (V/Hz) ⁽²⁾	230/50					230/50		
Maximum power consumption (VA)	17					21		
Hydraulic connection inlet/outlet	¾" BSP Male					¾" BSP Male		

(1) Eco⁺ configuration recommended for treatment of non-municipal water

(2) Supplied with 24 V transformer

Performance⁽³⁾

Model	Eco					Eco ⁺		
Resin	11	14	17	24	30	11	17	24
Nominal exchange capacity (m ³ ×f)	56	71	87	122	153	56	87	122
Nominal exchange capacity (m ³ ×d)	32	41	49	70	87	32	49	70
Salt usage per regeneration (kg) ⁽⁴⁾	1,4	1,8	2,1	3,0	3,8	1,4	2,1	3,0
Exchange capacity per kg salt (m ³ ×f)	41					41		
Exchange capacity per kg salt (m ³ ×d)	23					23		
Recommended max. service flow (m ³ /hr)	1,1	1,4	1,7	2,4	3,0	1,1	1,7	2,4
Rinse water usage per regeneration (@ 3 bar) (Ltr) ⁽⁴⁾	61	64	101	107	131	110	139	175

(3) Indicative numbers, performances depending on operating conditions and water quality

(4) Maximum salt/water usage as brining is proportional (Minimum of 60%)

Dimensions and weights

Model	Eco					Eco ⁺		
Resin	11	14	17	24	30	11	17	24
Width (mm)	352	352	391	391	391	352	391	391
Height (mm)	546	546	963	963	963	546	963	963
Depth (mm)	442	442	467	467	467	442	467	467
Depth, incl. bypass (mm)	525	525	550	550	550	525	550	550
Height inlet/outlet (mm)	454	454	846	846	846	454	846	846
Height inlet/outlet, incl. bypass (mm)	460	460	852	852	852	460	852	852
Weight (kg)	19,5	21	30,0	35,5	41,0	19,5	30,0	36,5
Weight, including bypass (kg)	20,0	21,5	30,5	36,0	41,5	20,0	30,5	37,0
Maximum salt storage capacity (kg)	25	25	65	65	65	25	65	65

Enjoy the benefits
of soft water!

What is hard water?

A majority of households struggles with the effects of hard water. But what is hard water? All our water comes from rain and depending where this rain falls, water stays naturally soft or becomes contaminated with all kinds of impurities. Water is a good solvent and picks up impurities as it moves through soil and rock. Two very common minerals, calcium and magnesium, make your water hard. Have you ever considered the negative effect of hard water on your household?

Let soft water make the difference in your house

The Slimline softener will change the way your water feels. Experience shinier, silkier hair after shampooing and a closer, better shave. Enjoy whiter, brighter and softer clothes and towels after laundering and reduce streaks and spots on dishes and glasses! Soft water will improve every aspect of your day to day life.

“ A clean and soft skin, whiter clothes, spotless dishes and easy to clean baths and shower.
Slimline, the easy way !”

Cleaner and whiter towels

Less detergents

Enjoy the taste of food cooked in treated water

10 reasons why you need to install our water softener even today!

1. Hardness is removed from your water, providing your home with good and clean water.
2. A water softener will extend the life of your domestic appliances and reduce repair and replacement costs.
3. Minerals that cause stains on baths, shower enclosures, sinks and kettles are filtered out of your water.
4. You can save over 50% on detergents, washing powders, cleaning products, shampoos and conditioners.
5. A water softener helps reduce skin problems and irritations. No more dry itchy feeling. You will enjoy a smooth and healthy skin that can breath naturally.
6. Drinking water will taste better.
7. You will have more free time as cleaning is easier and less time-consuming.
8. A water softener improves the efficiency of your heating systems, reducing heating bills by as much as 20%.
9. Your washing machine will do a better job washing your clothes with soft water. Without the minerals deposits, your clothes will last longer.
10. All the savings on electricity, detergents, heating cost and so one far outweigh the one-time expense of buying a water softener. Even better, for an average family of 4, a water softener pays for itself within 2-4 years.
